# INTRODUCTION

Filters are devices which separate solid particles from fluids. The filters used to filter solid particles from fluids or to separate dust from gas are made out of fibre or granules. The filtered fluid is known as the filtrate. The material held back through filtering is called residue. The process as such is known as filtration.

There is nothing more frustrating than to see a well designed system, which uses the best hydraulic components, fail simply because of dirt. Nevertheless, studies have shown that over 60% of all hydraulic systems down time can be attributed to untidy maintenance, and lack of proper filtration.

## The task of the hydraulic filter:

- To remove solid contaminants from the hydraulic medium thereby preventing failure of expensive components.
- Reducing aging of the hydraulic medium by removing contaminant that will cause chemical degradation.
- Maintain lubricity of the hydraulic medium.
- Helping to prevent wear of components, preventing leakage and heat generation.

## The contaminant:

- The contaminant is defined as any material or substance which is unwanted or adversely affects the fluid power system or component. Typical types of contamination are: chips, sand, dust, fibres, paint fragments, water or preservatives.

The contamination which is to be removed by filters comes from the direct surroundings of the hydraulic system via filler caps and seals. This type of contamination is known as external contamination or contamination entering from outside the system.

The moving parts in the hydraulic system e.g. pumps, pistons and valves also create particles (abrasion). This type of contamination creation is known as internal dirt production.

## The effects of contamination:

- It is important to understand the effects contamination has on the hydraulic system. There are two types of failures that can be attributed to contamination in the system. They are degradation failure and catastrophic failure.

## Degradation failure:

- This is probably the most costly contamination caused failure because it degrades the performance characteristics of virtually every component in the system. During degradation failure of a component, the abrasiveness of minute particles cause accelerated wearing of the close tolerance sealing surfaces. This increases internal leakage and reduces the performance capability of the component. Unfortunately degradation failure is a relatively slow process, which camouflages the loss of performance on a day to day basis.

## Catastrophic failure:

- This is the immediate failure of a system component. Although this type of failure is not always related to contamination, contaminants are the most probable cause. In catastrophic failure, large particles cause moving parts to jam or stick. With pumps, the contaminants can gather in a location which block critical lubrication passages. Without proper lubrication, immediate failure is sure to follow.

Considering the fact that contaminants cause failure, we must take positive steps to minimise the level of contamination in the hydraulic system. Common sense precautions will prevent many of the contaminants from entering the system, but there is no way to totally eliminate the source of contamination. To keep the number of contaminants, and their size, within tolerable limits, adequate FILTRATION must be provided.

# LOW PRESSURE FILTERS

## OMTF09 SERIES - TANK TOP FILTERS

Features		Filter Housing Performance	
● Simple and effective, the OMTF series tank top filters are ideal for installation on reservoirs of non sensitive systems such as agricultural applications	● Available with resin impregnated cellulose, microglass media or steel mesh filter media	Flow Rating	Up to 30lpm for 32 cSt fluids
● Readily interchangeability with other Italian filter brands.		Max Working Pressure	3 Bar
		Rated Fatigue Pressure	3 Bar
		Temperature Range	-25°C to 95°C
		Bypass Setting Option	1.7 Bar cracking
		Porting Head	Die Cast Aluminium
		Element Case	Reinforced Nylon

Complete filter assembly - Part number formulation					
Filter Series	Length code	Media grade	Seal Material	Indicator port option	Port size
OMTF09	1 = 82mm bowl	C10 = 10 µm (Cellulose) C25 = 25µm (Cellulose) F10 = 10 µm (Microglass) R60 = 60 µm (Steel Mesh)	N = Buna	A = 1/8" BSPT	Omit = 1/2" BSP

Sample Housing Part Number
OMTF091C25NA

Filter Element Performance	
Media Options:	Cellulose Fiber, Synthetic Fiber or Stainless Steel Mesh
Element Collapse Rating:	3 Bar
Fluid Compatibility with Buna Seals:	Petroleum Based Mineral Oils

Commonly Used Element Part Numbers						
Filter Series	Length Code	Element Part Number	Media Type	Media Grade (Cleanliness Target)	*Max Recommended Flow (lpm)	Clean ΔP at Max Recommended Flow (Bar)
OMTF09	1	CR091C10R	C Media	10 µm (Nominal)	27	<0.43 Bar
		CR091C25R	C Media	18µm (Nominal)	27	<0.43 Bar
		CR091F10R	F Media	10µm (20/18/15 or Better)	18	<0.43 Bar
		CR091R60R	Steel Mesh	60µm	27	<0.43 Bar
For element options other than those listed above please contact our call centre						

Max Recommended Flow is calculated for both filter housing and element using fluid of viscosity <46 cSt with specific gravity <0.9. For fluids with viscosity other than 46 cSt, contact the call centre and allow us to do the calculations for you.

## TFF SERIES

Tank Top Mounted Return Line Filters, Max 500l/min-10 bar

AN INNOVATIVE GREEN  
FILTER FEATURING®  
**LEIF®**

**Parker**

## BGT Series

Tank Top Mounted Return Line Filters, Max 2400l/min-10 bar

AN INNOVATIVE GREEN  
FILTER FEATURING®  
**LEIF®**

**Parker**

### Product Features

- TFF features pre-filtration by means of magnet column.
- Patented LEIF elements safeguard filtration quality.
- Flow from inside to out.
- Maximum pressure 10 bar. Maximum flow 500l/min.
- Options include a lifting port in the filter cover and second return port.

### Product Features

- BGT features pre-filtration by means of a magnet column.
- Patented LEIF elements safeguard filtration quality.
- Flow from inside out.
- Maximum pressure 10 bar. Maximum air flow 2400 l/min.
- Filter heads with multiple ports available.

### Technical Specification

#### Product Description:

Tank top mounted, return filter with aluminium head and cover

#### Maximum Working Pressure:

10 bar

#### Operating Temperature Range:

Seal material Nitrile:

-40°C to +100°C

Seal material Fluoroelastomer:

-20°C to +120°C

#### Seal Material:

Nitrile, fluoroelastomer

#### Bypass Setting:

Opening pressure 1.5 or 2 bar.

Other settings on request

#### Connections:

Threaded BSP ports.  
Flanged ports available

#### Filtration Media:<sup>\*</sup>

10 micron Microglass III & Ecoglass III for LEIF® elements

#### Options:

Diffuser type T (with closed diffuser end cap and with perforated plate area, recommended when oil entry in reservoir is close to the reservoir bottom or to ensure oil entry under the reservoir oil level)

### Technical Specification

#### Product Description:

Tank top mounted, return filter with aluminium head and cover

#### Maximum Working Pressure:

10 bar

#### Operating Temperature Range:

Seal material Nitrile:

-40°C to +100°C

Seal material Fluoroelastomer:

-20°C to +120°C

#### Seal Material:

Nitrile, fluoroelastomer

#### Bypass Setting:

Opening pressure 1.5 bar.

Other settings on request

#### Connections:

Flanges SAE2, 3. Threaded ports and multiple ports available

#### Filtration Media:<sup>\*</sup>

10 micron Microglass III and Ecoglass III for LEIF® elements

#### Options:

Diffuser type T (with closed diffuser end cap and with perforated plate area, recommended when oil entry in reservoir is close to the reservoir bottom or to ensure oil entry under the reservoir oil level)

# LOW PRESSURE FILTERS

## TANKTOPPER SERIES I, II & III

Tank Top Mounted Return Line Filters, with integrated Air Breathers.  
Max. 650l/min - 10 bar

AN INNOVATIVE GREEN  
FILTER FEATURING  
**LEIF®**

**Parker**

## PT TANK TOP MOUNTED FILTER SERIES

Max. 400l/min - 10 bar

**Parker**

### Product Features

- Tanktopper offers a total filtration solution + integrated air breather.
- Patented LEIF elements safeguard filtration quality.
- Maximum pressure 10 bar. Maximum flow 650 l/min.
- In-to-Out filtration plus gauge and switch options.

### Product Features

- Compact tank top mounted return line filter.
- Filter element can be used for direct screw-in mounting with co-polymer reservoirs
- Flow capability up to 400 l/min at 10 bar working pressure.
- In-to-Out flow avoids re-contamination of the system.
- Parker quality filter element.

### Technical Specification

#### Product Description:

Tank top mounted, return filter with aluminium head and co-polymer cover

#### Maximum Working Pressure:

10 bar

#### Operating Temperature Range:

-40°C to +80°C

#### Seal Material:

Nitrile, fluoroelastomer (on request)

Opening pressure 1.5

#### Bypass Setting:

1.7 bar

#### Connections:

Threaded BSP or SAE ports. Second return port available for Tanktopper II and Tanktopper III

#### Filtration Media:<sup>\*</sup>

10 micron Microglass III, Ecoglass III for LEIF® element. Air breather 10 micron Abs

#### Magnetic Pack Options:

Optional for Tanktopper I. Standard for Tanktopper II and III

### Technical Specification

#### Product Description:

Tanktop mounted, return filter with aluminium head design

#### Maximum Working Pressure:

10 bar

#### Seal Material:

Nitrile, fluoroelastomer

#### Operating Temperature Range:

-20°C to +100°C

#### Bypass Settings:

1.7 bar

#### Connections:

PT2: G $\frac{3}{4}$ " and G1"  
PT4: G1" or G1 $\frac{1}{4}$ "

#### Filtration Media:<sup>\*</sup>

10 micron Microglass III

#### Indicator Options:

Visual and electrical switch (NO or NC) type

Max Recommended Flow is calculated for both filter housing and element using fluid of viscosity <46 cSt with specific gravity <0.9. For fluids with viscosity other than 46 cSt, contact the call centre and allow us to do the calculations for you.

## Spin-on Cartridges

### Features

#### Efficient filter for modern hydraulic systems

- Modular system for optimum filter selection
- Small space requirement through compact design
- Minimal pressure drop through optimal flow design of components
- Equipped with highly efficient Mic, Sm-N or Sm filter elements
- Guaranteed separation according to ISO 16889 multipass test
- Elements with high differential pressure stability and dirt holding capacity
- Customer-specific printing on request
- Worldwide sales

# LOW PRESSURE FILTERS

## MAXIFLOW + PS SERIES

Spin-on Filters, Max. 360l/min - 10 bar

### Product Features

- Maxiflow full flow filters for suction or return applications.
- Maximum pressure 10 bar. Maximum flow 360 l/min.
- Available with a variety of integrated and ass-on indicators.
- High quality filter medium.

### Technical Specification

#### Product Description:

Full flow spin-on filters  
for suction or return

#### Seal Material:

Preferred Series MXA: Nitrile  
PS Series: Buna (nitrile)

#### Filter Head Material:

Preferred Series MXA:  
Aluminium LM24  
PS Series: Aluminium alloy

#### Bypass:

Preferred Series MXA: Return line  
1.05 bar, Suction line 0.17 bar,  
No bypass option

#### Filter Bowl Material:

Preferred Series MXA: Steel  
PS Series: Steel

PS Series: Return line 1.5 bar, Suction  
line 0.10 bar, No bypass option

#### Maximum Working Pressure:

Preferred Series MXA: 10 bar  
PS Series: 10 bar

#### Filtration Media:\*

Preferred Series MXA: 10 micron  
Microglass III media, Cellulose media  
PS Series: 10 micron Microglass III  
media, Cellulose media

#### Operating Temperature Range:

Preferred Series MXA:  
-30°C to +90°C

PS Series:  
-30°C to +110°C

# LOW PRESSURE FILTERS - Pi 230

## Technical specifications

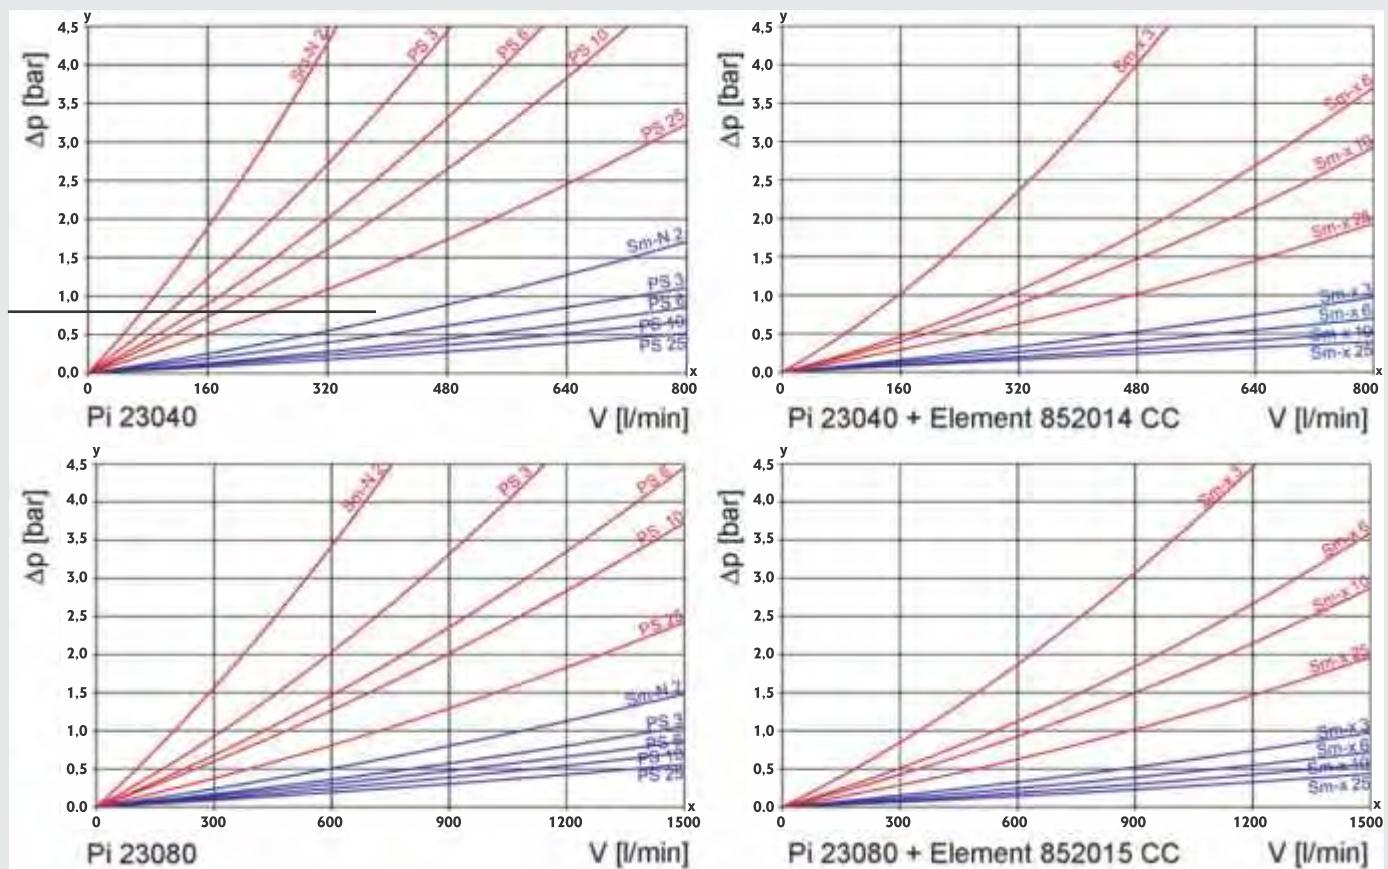

<b>Nominal pressure (10<sup>7</sup>LW):</b>	25 bar (360 psi)
<b>Nominal pressure (static):</b>	40 bar (570 psi)
<b>Temperature range:</b>	-10 °C to +120 °C (other temperature ranges on request)
<b>Bypass setting:</b>	D 3.5 bar ± 10 %
<b>Filter head and cap material:</b>	GAL
<b>Filter housing material:</b>	AL
<b>Sealing material:</b>	NBR
<b>Maintenance indicator setting:</b>	D p 2.2 bar ± 0.3 bar
<b>Electrical data of maintenance indicator:</b>	
<b>Maximum voltage:</b>	250 V AC/200 V DC
<b>Maximum current :</b>	1 A
<b>Contact load:</b>	70 W
<b>Type of protection:</b>	IP 65 in inserted and secured status
<b>Contact:</b>	normally open/closed
<b>Cable connection:</b>	M20x1.5

Filtration Group®  
Filtering The World

## Flow rates/pressure drop curve (filter housing incl. element)

190 mm<sup>2</sup>/s  
33 mm<sup>2</sup>/s

x = flow rate V [l/min]  
y = differential pressure Dp [bar]

## Order numbers

Example for ordering filters:

Filter housing	Filter element
Nominal size: 800, with bypass, electrical maintenance indicator, inlet at the side for standard filter elements	PS 10
Type: Pi 23040/22-058	Type: Pi 852014 PS 10
Order number: 76320972	Order number: 76321814

# LOW PRESSURE FILTERS - Pi 230

	4	V3RB4C03	Cpak $\frac{3}{4}$ (MicroGlass)	3μm (16/14/12 or Better)	85	0.86 Bar
		V3RB4C05	Cpak $\frac{3}{4}$ (MicroGlass)	5μm (18/16/14 or Better)	115	0.86 Bar
		V3RB4C10	Cpak $\frac{3}{4}$ (MicroGlass)	10μm (20/18/15 or Better)	132	0.86 Bar
		V3RB4C20	Cpak $\frac{3}{4}$ (MicroGlass)	20μm (22/19/16 or Better)	153	0.86 Bar
		V3RB4M25	M Media (Reusable)	25μm Stainless Steel Mesh	153	0.86 Bar

For element options other than those listed above please contact our call centre

Max Recommended Flow is calculated for both filter housing and element using liquid of viscosity <46 cSt with specific gravity <0.9. For liquids with viscosity other than 46 cSt, contact the call centre and allow us to do the calculations for you.

# MEDIUM PRESSURE FILTERS - Pi 360

## Technical specifications

### Design:

**Nominal pressure:** Pi 3615-3645

Pi 3605, 3608, 3611

**Test pressure:** Pi 3615-3645

Pi 3605, 3608, 3611

**Temperature range:**

\* NPT- and SAE- port connections on request

## Installation, operating and maintenance instructions

### Filter installation

When installing the filter make sure that sufficient space is available to remove filter element and filter housing. Preferably the filter should be installed with the filter housing pointing downwards.

The maintenance indicator must be visible.

### Connecting the electrical maintenance indicator

The electrical indicator is connected via a 2-pole appliance plug according to DIN EN 175301-803 with poles marked 1 and 2. The electrical section can be inverted to change from normally open to normally closed position or vice versa.

# MEDIUM PRESSURE FILTERS

## GMF IProtect

Medium pressure filters, max. 600 l/min - 70 bar

## ECO 130 SERIES

Medium Pressure Filters, Max. 1400l/min. 30 bar

### Product Features

- More compact solutions are possible.
- Filter element remains in filter bowl during filter service.
- Reduce waste over 50% thanks to re-usable element core.
- No risk of installation mistake due to a 'foolproof' design.
- Easy to integrate into hydraulic manifold solutions.

### Product Features

- In-line filter as a single filter, a dual unit, a parallel unit or a filter system.
- Single filter flow rate 1000 l/min. max.
- Dual and parallel unit flow rate 1400 l/min. max.

### Technical Specification

#### Pressure ratings:

Maximum allowable operating pressure: 70 bar  
Rated fatigue pressure: 56 bar

#### Connections:

Several threaded port options available, flange faced ports available on GMF size 4.

#### Connection style Model

GMF size 2 GMF size 3 GMF size 4  
BSP(G) 1", 3/4" 11/4", 11/2" 11/2", 2"  
SAE 12, 16, 24 24, 32  
Metric 3000-M 2"

#### Filter housing:

Head material aluminium.  
Bowl material hard anodized aluminium.

#### Seal material:

Nitrile or fluoroelastomer.

#### Operating temperature range:

Seal material Nitrile: -20°C to +100°C.  
Seal material Fluoroelastomer: -20°C to +120°C.

#### Bypass valve & indicator settings:

Table following gives bypass valve and corresponding indicator setting.

#### Bypass Indicator

1.7 bar 1.2 bar  
3.5 bar 2.5 bar  
6 bar 5 bar

#### Filter element:

##### Degree of filtration:

Quantumfiber™ filter media, determined by Multipass-test according to ISO16889

#### iprotect® QI

Supported with epoxy coated metal wire mesh, end cap material reinforced composite. Collapse pressure rated at 20 bar (ISO 2949)

#### Indicator options (all with SAE8 thread):

Visual M3. - electrical T1.  
Electronic F1(PNP). - electronic F2(NPN).

**For more information see the HFDE product catalogue Ref: FDHB500.**

### Technical Specification

#### Maximum Working Pressure:

Single filter: 30 bar  
Dual and parallel units and filter systems: 16 bar

#### Operating Temperature:

-40°C...+100°C with Nitrile seals,  
-20°C...+120°C with Fluoroelastomer seals.

#### Seal Material:

Nitrile or optionally fluoroelastomer

#### Bypass Valve:

Opening pressure 3.5 bar

#### Connections:

Single filter: Flanges SAE 2" 3000-M, SAE 2½" 3000-M or with adaptor threads G1½ or G2.  
Dual units: Flanges SAE 3" 3000-M or with adaptor threads G2.  
Parallel units and filter systems: DN80/PN16 or DN100/PN16

#### Filtration Materials:

- Glassfibre Microglass III
- Environmentally friendly Ecoglass III. No metal parts.
- Cleanable metal mesh

#### Assembly:

In-line filter as a single filter, a dual unit, a parallel unit or a filter system with L-bore selecting valve assembly (only one side in use). Vertical installation

#### Nominal Flow Rate (30 cSt):

Single filter: 1000 l/min (60 m³/h)  
Dual and parallel units and filter systems: 1400 l/min (84 m³/h)

#### Housing Material:

Aluminium

#### Differential Pressure Indicators:

Visual indicator always included to each column, setting 2.5 bar.  
Optional electrical or electronic indicators to be mounted on lower indicator port

#### Fluid Compatibility:

Suitable for use with regular hydraulic and lubrication oils.

# HEAVY DUTY/HIGH PRESSURE FILTERS

## DF40

Duplex Filters, max. 200l/min. 40 bar

### Product Features

- Fuel filter for diesel engines up to 10MW.
- Lubrication filter for gearboxes and propulsion systems.
- Medium pressure duplex filter in hydraulic systems.
- In-line return duplex filter in hydraulic systems.

### Technical Specification

#### Maximum Working Pressure:

40 bar

#### Operating Temperature Range:

-20°C...+120°C with Fluoroelastomer seals, -20°C...+160°C with metal mesh elements and Fluoroelastomer seals

#### Seal Material:

Fluoroelastomer

#### Bypass Valve:

Standard without bypass, optional opening pressure 3.5 bar

#### Connections:

Flanges SAE 1½ 3000-M as standard. Optional thread connections G1½ and G1¼ available with flange adapters

#### Duplex Filter:

Change-over valve with open center position. Locking device for both end positions. Element change is possible by opening either the top cover or the bowl in the bottom.

#### Housing Material:

Cast iron (GJS)

**Weight:** 52 kg

**Nominal Flow Rate [30 cSt]:**  
200 l/min (12 m³/h)

#### Filter Elements:

- Environmentally friendly Ecoglass III elements, micron ratings(abs): 2 µm, 5 µm, 10 µm and 20 µm. Ecoglass III elements contribute to because they do not include metal parts
- Glassfibre Microglass III elements, micron ratings(abs): 2 µm, 5 µm, 10 µm and 20 µm
- Cleanable metal mesh elements, micron ratings(abs): 35 µm and 60 µm

#### Fluid Compatibility:

Suitable for use with regular hydraulic and lubrication oils & light fuel oils.

## EPF IPROTTECT (Ecological Pressure Filter)

High Pressure Filters, Max 700l/min - 450 bar

### Product Features

- Designed with the iproject patented filtration technology.
- Filter element remains in filter bowl during filter service.
- Reduce waste by typically 50% or more.
- No risk of installation mistakes due to 'foolproof' design.
- Easy to integrate into hydraulic manifold solutions.

### Technical Specification

#### Maximum working pressure:

450 bar Filter housing pressure pulse fatigue tested 10<sup>6</sup> pulses 0-450 bar

#### Operating temperature range

Seal material Nitrile : -40 °C to +100 °C Seal material Fluorelastomer: -20 °C to +120 °C

#### Seal material

Nitrile of Fluorelastomer

#### Bypass valve & Indicator settings

Bypass	Indicator
3.5 bar	2.5 bar
5.0 bar	3.5 bar
7.0 bar	5.0 bar
Blocked	5.0 bar

#### Connections

Inlet and outlet connections are threaded internally

#### Connection style

Thread G½ - G1½

#### Specification

Nominal flows 40 l/min-500 l/min

#### Filter housing

Head material cast iron (GSI)  
Bowl material steel

#### Microglass III

Supported with epoxy coated metal wire mesh, end cap material reinforced composite and reusable metal inner core. Collapse pressure 25 bar (ISO 2941)

#### Indicator options

Indicating differential pressure:

2.5 +/- 0.3 bar

3.5 +/- 0.3 bar

5.0 +/- 0.3 bar

For element options other than those listed above please contact our call centre

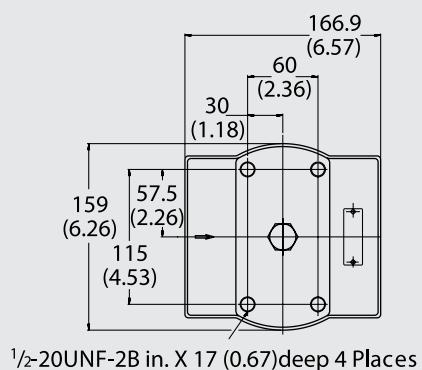

Max Recommended Flow is calculated for both filter housing and element using fluid of viscosity <46 cSt with specific gravity <0.9. For fluids with viscosity other than 46 cSt, contact the call centre and allow us to do the calculations for you.

# HIGH PRESSURE FILTERS - HF3P

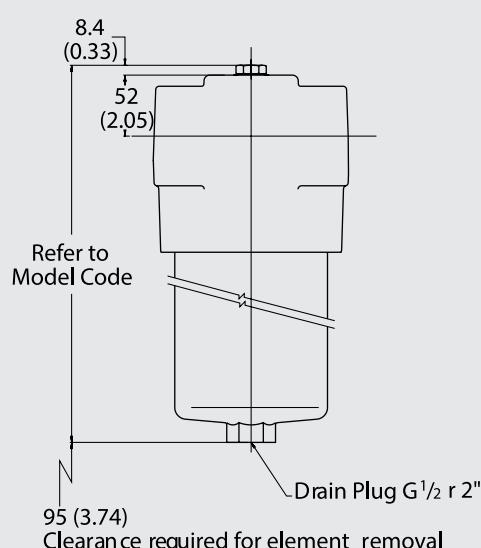

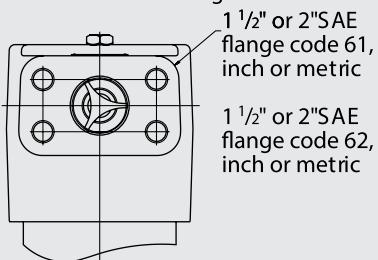

**HF3P Series - High Pressure Filters**

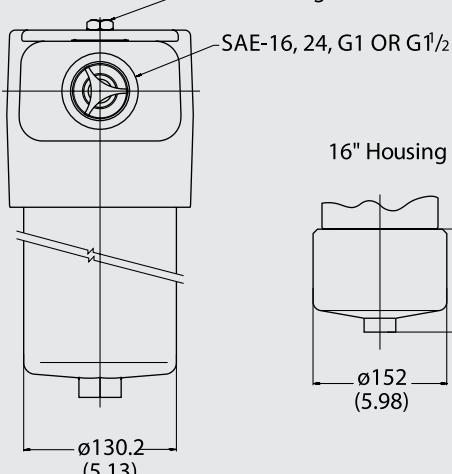

Features and Benefits	Filter Housing Performance	
● Conforms to HF3 automotive specifications	Flow Rating:	Up to 454 lpm for 32 cSt fluids
● Available with reverse low valve for hydrostatic transmissions	Max Working Pressure:	410 Bar
● Fatigue rated at 410 bar for max reliability in the toughest applications	Rated Fatigue Pressure	410 Bar
● High collapse elements available for non-bypass applications	Temperature Range:	- 26 ° C To 121 ° C
● Accepts a wide variety of clogging indicator options	Bypass Setting Options:	6 Bar, reverse low, or non-bypass
● Accepts a wide variety of filter media options	Porting Head:	Ductile Iron
	Element Case:	Carbon Steel

		V6024B5H03	HPak (High Strength)	3µm (16/14/12 or Better)	150	<1.5 Bar

For element options other than those listed above please contact our call centre

Max Recommended Flow is calculated for both filter housing and element using fluid of viscosity <46 cSt with specific gravity <0.9. For fluids with viscosity other than 46 cSt, contact the call centre and allow us to do the calculations for you.

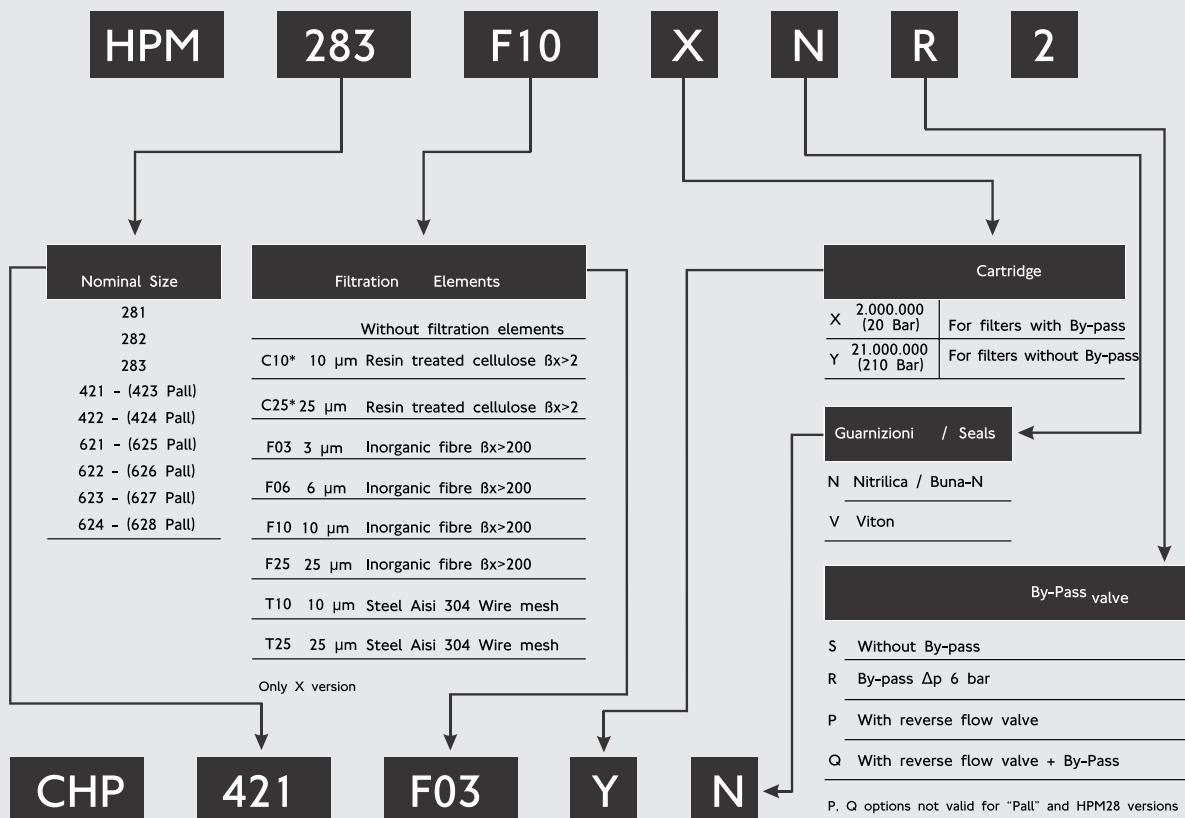

# HIGH PRESSURE FILTERS

**HPM Series - High Pressure Filters**

Features and Benefits	Filter Housing Performance
• HPM series is a high pressure filter series up to 420Bar.	Flow Rating: Up to 400 lpm for 30 cSt liquids
• The range is composed by 3 different sizes with nominal low rates up to 410L/min.	Max Working Pressure: 420 Bar
• Filter housing available with threaded or langed connection.	Rated Fatigue Pressure: 125 Bar
• Filter elements are made with the most advanced materials, as a guarantee for a high filtration efficiency and a long life.	Temperature Range: - 20 ° C TO 95° C
	Bypass Setting Option: 6 Bar $\pm$ 10% (from opening)
	Porting Head: Cast Iron
	Element Case: Steel or Cast Iron

# DUPLEX FILTER - Pi2100

Nominal pressure 32/63 bar (460/900 psi), nominal size up to 400 according to DIN 24550

## Technical specifications

### Design:

**Nominal pressure:**  
Pi 21004-21010

Pi 21016-21040

### Test pressure:

Pi 21004-21010  
Pi 21016-21040

**Temperature range:**  
-10 °C to +120 °C  
survival temperature - 40 °C  
(other temperature ranges on request)

### line mounting filter

10<sup>7</sup> load changes  
63 bar (900 psi)  
10<sup>7</sup> load changes  
25 bar (360 psi)  
2x 10<sup>6</sup> load changes  
32 bar (460 psi)

### Bypass setting:

D<sub>p</sub> 3.5 bar – 10 %

### Filter head material:

GAL

### Filter housing material:

AL/St.

### Sealing material:

NBR/AL

### Maintenance indicator setting:

D<sub>p</sub> 2.2 bar – 10 %

### Electrical data of maintenance indicator:

**Max. voltage:** 250 V AC/200 V DC

**Max. current:** 1 A

**Contact load:** 70 W

**Type of protection:** IP 65 in inserted and secured status

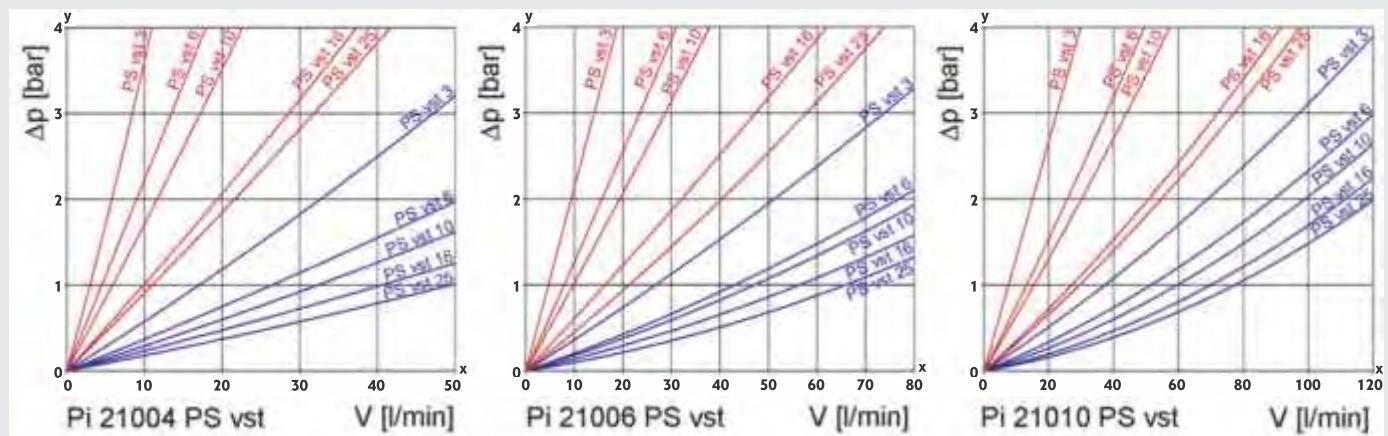

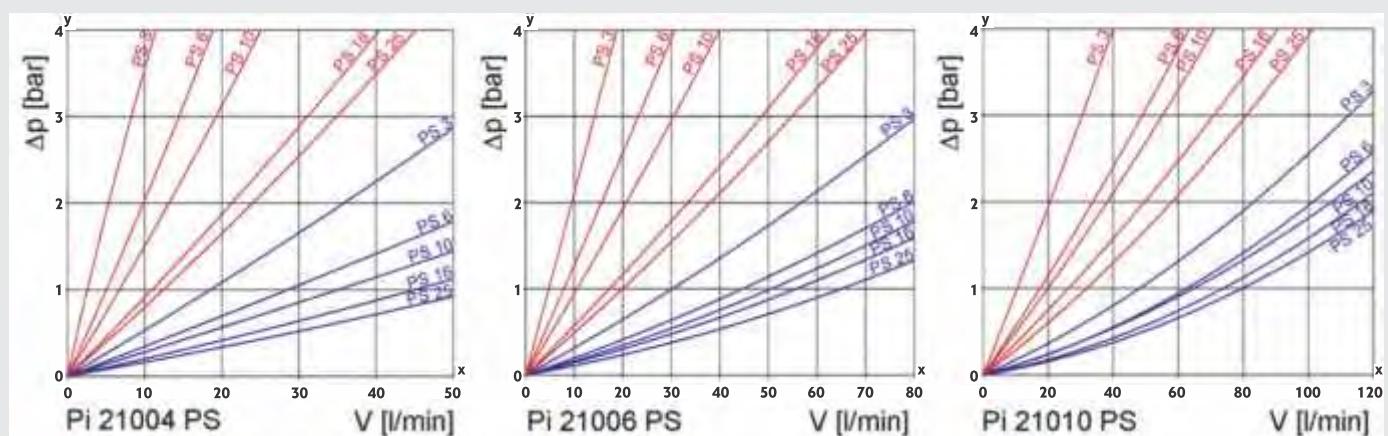

**Contact:** normally open/closed

M20x1.5

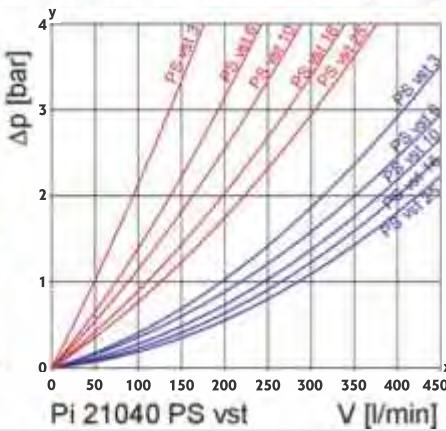

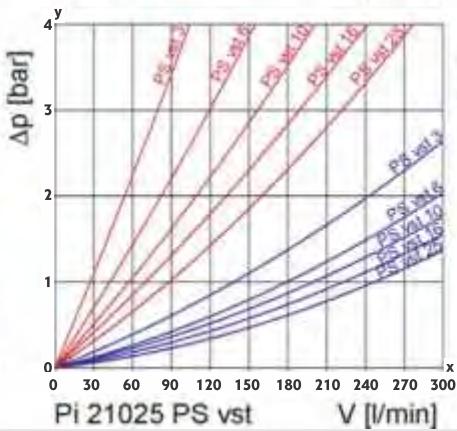

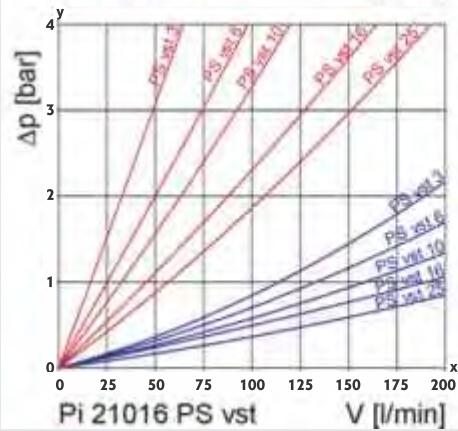

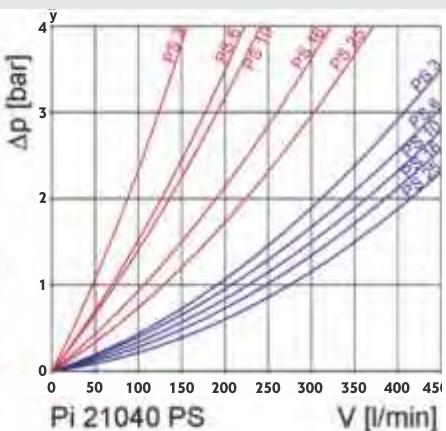

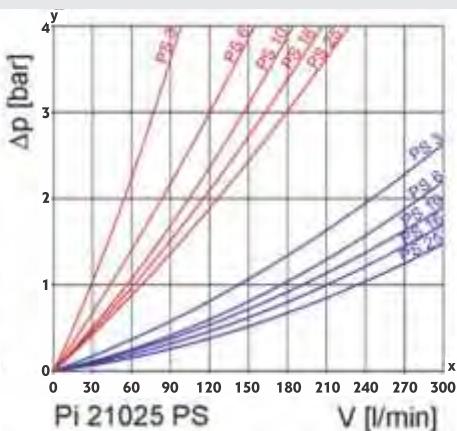

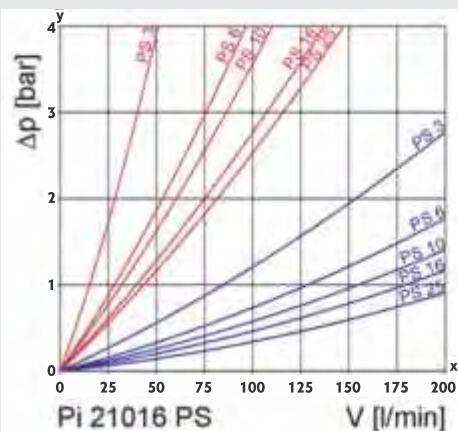

### Cable connection:

## Flow rate/pressure drop curve complete filter

# DUPLEX FILTER - Pi2100

y = differential pressure  $\Delta p$  [bar]

x = flow rate  $V$  [l/min]

## Order numbers

Example for ordering filter:

Housing design	2x Filter elements
V = 100 l/min and electrical maintenance indicator	PS vst 3 NBR
Type: Pi 21010-069	Type: Pi 71010 DN PS vst 3
Order number: 78204158	Order number: 78227480

# AIR BREATHER FILTER - Pi0101 - Pi0185

 **Filtration Group<sup>®</sup>**  
Filtering The World

## Technical specifications

### Separation:

Mic	10 µm	Pi 0145 to Pi 0149	polyamide
Sm-L	3 µm	Pi 0152 to Pi 0154	galvanized sheet metal
Mol	oil mist	Pi 0182 to Pi 0185	steel/Al

### Temperature range:

-30 °C to +100 °C

(other temperature ranges on request)

### Sealing material:

Pi 0126	rubberized cork
Pi 0140 to Pi 0185	NBR

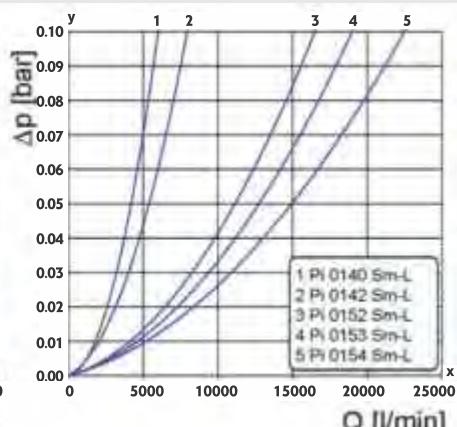

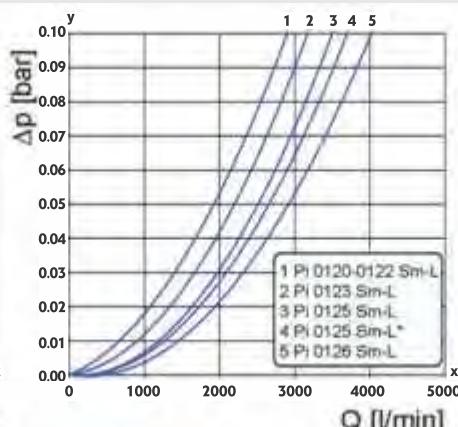

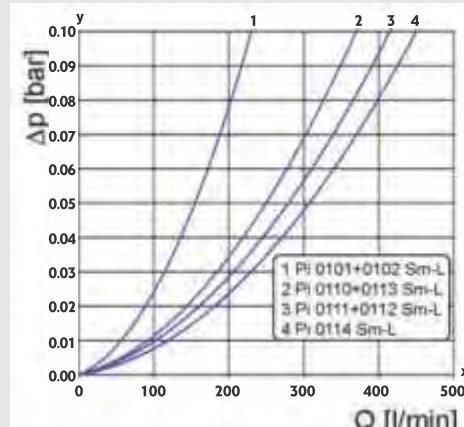

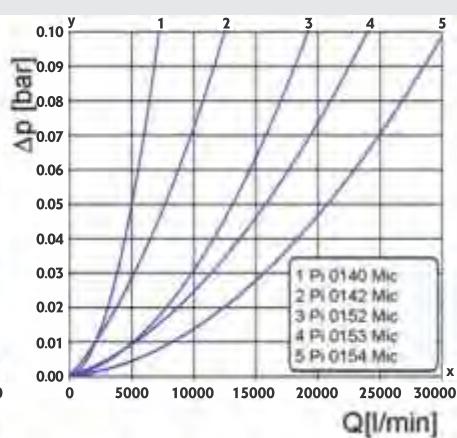

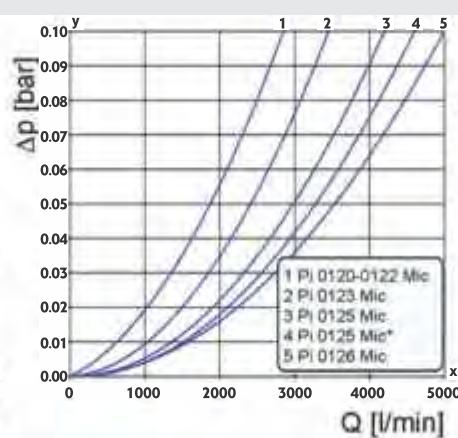

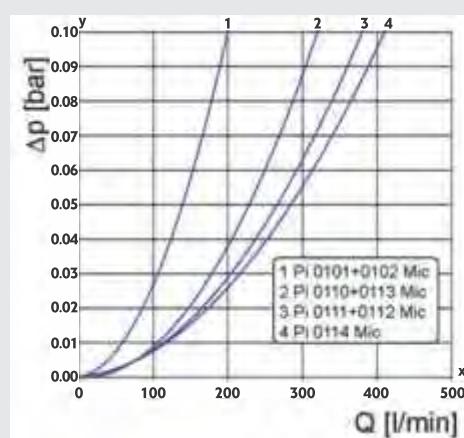

### Housing material:

Pi 0101 to Pi 0126	polyamide
Pi 0140 to Pi 0142	galvanized sheet metal

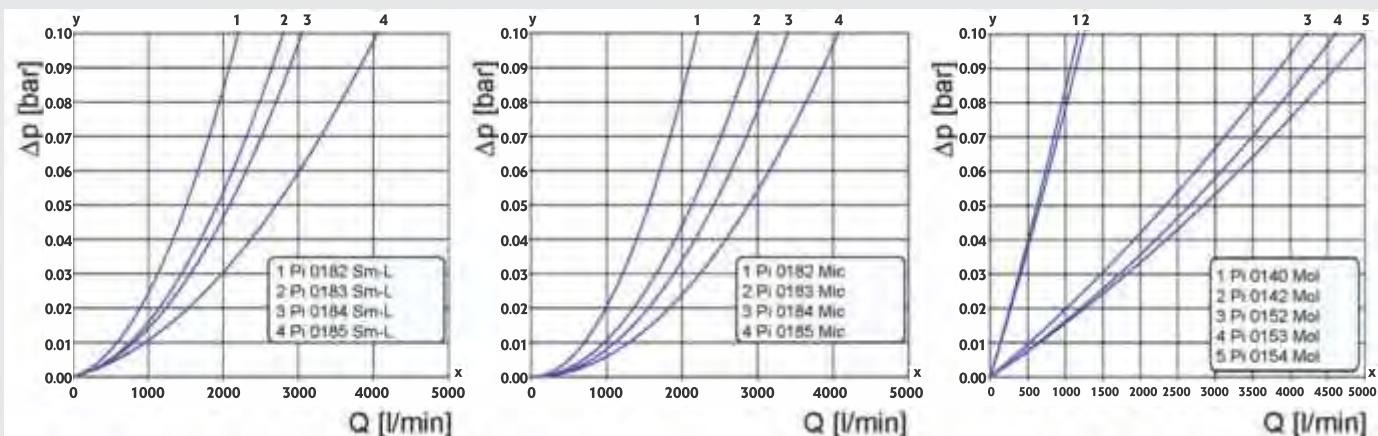

### Resistance:

all hydraulic oils

## Flow rate/pressure drop curve complete filter

# AIR BREATHER FILTER - Pi0101 - Pi0185

y = differential pressure  $\Delta p$  [bar]

x = air flow rate  $Q$  [l/min]

\* without grid

# AIR BREATHER FILTER - Pi0101 - Pi0185

We draw attention to the fact that all values indicated are average values which do not always occur in specific cases of application. Our products are continually being further developed. Values, dimensions and weights can change as a result of this. Our specialized department would be pleased to offer you advice.

We recommend you to contact us concerning applications of our filters in areas governed by the EU Directive 94/9 EC (ATEX 95). The standard version can be used for liquids based on mineral oil (corresponding to the fluids in Group 2 of Directive 97/23 EC Article 9). If you consider to use other fluids please contact us for additional support.

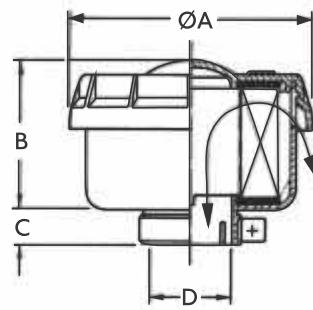

Subject to technical alteration without prior notice.

## Maintenance indicator

The types Pi 0101 - 0185 may be equipped with a maintenance indicator for optimal filter element exploitation. They indicate when the filter element must be serviced and thus save unnecessary costs.

Vacuum indicator/ Air breather

# FILTER BREATHERS

## FILTER BREATHERS & ENVIRONMENTAL AIR FILTERS

EAB Series Air Filters

Glass-filled Nylon and Metal Breathers

**Parker**

**Parker**

### Product Features

- EAB series - airflow up to 1500 l/min. Visual gauge option.
- Compact EAB10 airflow up to 1000 l/min, visual gauge option.

### Product Features

- IP65 rated, non-corrodible glass-filled nylon range.
- Metal Pressurised and unpressurised range.

### Technical Specification

#### Construction:

Glass reinforced composite housing with Eco-element.

#### Filter media options:

P020: High quality polyester media. 2µm (abs) C015: Polyester media with water-resistant layer. 1.5µm (abs) Q010: Glass fibre media. 1.0µm (abs).

#### Mounting options:

With 6 screws. Includes machine and plate screws, a strainer and gaskets External threads G $\frac{3}{4}$ , G1 Internal thread G $\frac{1}{2}$ .

#### Options:

Visuals gauge type vacuum/pressure indicator. Overpressure valve, pressure setting 0.2 bar. EAB10 cannot be specified with an overpressure valve and vacuum/pressure gauge at the same time.

### Technical Specification

#### Construction - IP65 Rated filter breathers

Moulded in non-corrodible glass filled nylon combining strength with a light weight design.

#### Construction - Metal Range

Air breathers and filter breathers designs available in pressurised and unpressurised options.

## SPIN-ON AIR BREATHERS

Reservoir Equipment

- High capacity air breathers designed for the removal of airborne contamination in hydraulic systems to support environmental maintenance.
- Ideal for high flow systems and heavily contaminated environments.
- Disposable spin-on elements quickly and easily replaced.
- 5 micron nominal quality filtration elements.
- 2 modules available - 700 l/min and 1500 l/min.
- Available with a pressurised valve in the mounting adaptor.

Note: Spin-on air breather elements can also be mounted directly on to any suitable length of  $\frac{3}{4}$ " BSP threaded pipe.

Mounting Detail

# SILICA GEL BREATHER

## Triceptor

### Installation

Triceptor breathers are designed for simple installation on most equipment, regardless of connection. Since TriCeptor breathers are disposable, the threaded connection allows for quick and easy maintenance. Several mounting adaptors (shown below) are available to provide the desired mounting. The installation / replacement process consists of four easy steps:

- Remove from protective plastic wrap
- Remove 25mm blue cap from standpipe
- Remove foil label to expose the necessary amount of air intake holes
- Twist Triceptor into mounting adapter

### Air Flow Performance

The curves below show the air flow performance of the three Triceptor breathers. To ensure the longest life possible, the initial clean pressure drop should not exceed 0.103 bar.

Model	Part Number	Quantity
127mm Breather	934330T	6 pcs
128mm Breather	934331T	6 pcs
229mm Breather	934332T	6 pcs
Field Adapter Nylon	937546	1 pc

## FLUID LEVEL MEASUREMENT

Fluid Level Temperature Gauges

**Parker**

## SUCTION ELEMENTS

Proven solutions for oil reservoir efficiency

**Parker**

### Product Features

- 3 sizes of fluid level/temperature gauge.
- 2 hole mounting.
- 76 mm, 127mm and 254mm mounting centres.
- One-piece design, high visibility viewing lens for added security.
- Moulded in splatterproof, transparent polyamide

For more information see the HFDE product catalogue Ref: FDHB500.

### Product Features

- A range of quality elements for reservoir and system application.
- A high quality range of suction elements designed to compliment a reservoir installation including in-tank suction strainers and oil diffusers, metal and polyester in-line filters and drive couplings with nylon sleeve and sintered steel couplings.
- In-tank suction strainers.
- Constricted in stainless steel media with 30% glass-filled nylon head and Zintec centre tube.
- Maximum working temperature 90°C.
- 125 micron filtration media.
- Bypass rating 0.17bar.

## 10F and 50F Series - In Line Suction Filters

Powering Business Worldwide

# Vickers

Features and Benefits		Filter Housing Performance	
• Standard integral air bleed feature enables faster priming of pumps		Flow Rating:	Up to 329 lpm
• Stainless steel elements can be cleaned and reused		Max Working Pressure:	0.3 Bar Vacuum to 20 Bar
• Standard bypass valve protects against pump damage resulting from clogged filter		Filtration	149 or 70 Micron
• Standard with large, easy-to-read clogging indicator		Temperature Range:	- 40 ° C TO 107 ° C
• Available with optional magnetic pre-filter to trap ferrous metal particles which greatly extends element life		Cap and Housing:	Aluminium

## Flow meters (Brass Version)

## LoFlow and Easiflow

Product Features	
• Works in any plane.	
• Pressure up to 350 bar (5000 psi).	
• Flow up to 360 l/min.	
• Accuracy $\pm 5\%$ FSD.	
• Repeatability $\pm 1\%$ FSD.	
• Direct Reading.	
• Relatively insensitive to viscosity changes.	
• Oil or water calibrated.	
• Optional reed switch upgrade.	

Product Features (LoFlow)	
• Easy to read, permanent printed scales.	• Negligible pressure drop characteristics.
• Large scale definition for precise measurement	• 10 bar pressure rating. • Simple to use.

### Technical Specification (LoFlow)

**Construction:**  
Body - Grillon TR55.  
Back body half - ABS 7020.  
Float - Acetal

**Maximum working temperature:** 60°C.  
**Accuracy:**  $\pm 2\%$  typical.  
**Repeatability:**  $\pm 1\%$ .  
**Connections:**  $\frac{1}{4}$  and  $\frac{3}{4}$  tapered threads.

### Ordering Information

Product Number	Media	Flow Range (l/min)	Switch Range (l/min)
LF802412	Water	3/4 - 3/4	0.2 - 2.0
LF802432	Oil	3/4 - 3/4	0.1 - 0.9

### Product Features (Easiflow)

- Oil and water calibrated.
- Pressures up to 10 bar.
- Works in any plane.
- Flows from 1 to 150 l/min.

### Technical Specification

<b>Construction:</b> Brass body to BS 2874 CZ114.	<b>Viscosity Range:</b> 10 to 200 cSt (oil).
<b>Maximum Working Pressure:</b> Up to 350 bar.	<b>Accuracy:</b> $\pm 5\%$ FSD.
<b>Minimum Working Pressure:</b> 1 bar.	<b>Repeatability:</b> $\pm 1\%$ FSD.
<b>Temperature Range:</b> Brass 20°C to +90°C.	<b>Min. Scale Reading:</b> 10% FSD.
<b>Calibration:</b> Oil Specific gravity 0.856 at 20°C.	<b>Connections:</b> BSP parallel threads.
Water Specific gravity 1.0 at 20°C.	<b>Wetted/Non-wetted Parts:</b> Consult Parker for information.

### Technical Specification (Easiflow)

<b>Meters</b>	<b>Flowswitch</b>
<b>Construction:</b> Body - Glass filled nylon Viewing glass - Borosilicate glass Seal - Nitrile	The Easiflow switch is a flow measuring device incorporating an AC/DC switch
<b>General Flowmeter Specification:</b> See material details opposite.	
<b>Maximum Working Pressure:</b> 10 bar.	<b>Switch Type Specifications:</b>
<b>Minimuorking Pressure:</b> 1 bar.	Magnetically operated reed switch.
<b>Temperature Range:</b> +5°C to +80°C - Oil. +5°C to +60°C - Water.	<b>Electrical Details:</b> Voltage range 300Vac/dc Maximum current 2.5Amps
<b>Flow Rate:</b> 1 to 150 l/min.	Maximum load 100W resistive
<b>Viscosity Range:</b> 10 to 200 centistokes (oil).	70W
<b>Connections:</b> 1 BSP parallel threads.

**INDICATOR SERIES**

FMU Δp-Indicators and Pressure Indicators, Max. 420 bar

Product Features
• The FMU range of filter condition indicators, designed for use on a wide range of Parker filters.
• Accurate visual, electronic or electrical filter condition feedback.
• Maximum pressure 420 bar.
• Mobile, industrial and marine applications.

**Technical Specification**

**Maximum Working Pressure:**  
420 bar (250 bar for aluminium)

**Maximum Differential Pressure:**  
210 bar

**Working Temperature Range:**  
-20°C to +85°C with fluoroelastomer seals, -40°C to +85°C with nitrile and EPDM seals

**Material of Housing:**  
Brass, aluminium or stainless steel

**Seals:**  
Fluoroelastomer, Nitrile or EPDM

**Mounting Torque:**  
max. 75 Nm  
(max. 50 Nm for aluminium indicator body & filter housing)

\*Note: All filter assemblies are supplied with plugged indicator ports. Indicator codes are shown on Page 10. Indicators can be ordered separately from the filter assembly. 10 micron element options have been selected for all filter products in this overview except EPF, DF40 and Eco 130 Series filters.

# CLOGGING INDICATORS

## Indicating Pressure Gauges - Selection Matrix

- These pressure Gauges are used to indicate when Tank-top or Spin-on type filters are blocked, by observing the reading on the gauge during operation, the operator can see when the pressure reading across the filter media reaches a predetermined level, signalling that the filter is clogging and requires servicing.
- Colour coded versions are available for easy reading, vacuum gauges are also available for suction line filters

Filter Series	Pressure Gauge-Part Numbers	Type	Settings & Features			
			Pressure Range	Scale	Colour Coding	Port Connection
RT OMTF P-237917 T10V0R T05V0R	LFT-134-2	Colour Coded Pressure Gauge	0 - 4 Bar	-	ü	1/8"NPT
	PV1	0 - 12 Bar Pressure Gauge	0 - 12 Bar	0 - 12 Bar	-	1/8"BSPT

Filter Series	Pressure Gauge-Part Numbers	Type	Settings & Features			
			Pressure Range	Scale	Colour Coding	Port Connection
T31V0A T10V0A T05V0A	VV1	Colour Coded Vacuum Gauge	0 - 76 Hg (Vacuum)	-	ü	1/8"BSPT
SFB	VV2	Colour Coded Vacuum Gauge	0 - 76 Hg (Vacuum)	-	ü	1/4"BSPT

## Indicating Pressure Switches - Selection Matrix

- These pressure switches are used to indicate when Tank-top or Spin-on type filters are blocked, by facilitating an electrical signal to the control when the pressure reading reaches a certain level.
- Simply select the features and settings required for your application in the selection matrix below, and then find the appropriate indicator part number from the list of indicators that are assigned to your selected filter series.
- For special configurations other than those listed in the standard range, please contact the call centre.

Filter Series	Pressure Switch - Part Numbers	Type	Settings & Features		
			Pressure Range	Electrical Connection	Port Connection
RT OMTF P-237917 T10V0R T05V0R	P23305101H	Pressure Switch	0 - 2 Bar	Hirschman (DIN43650)	1/8"NPT
	OMTI E	Pressure Switch	0 - 2 Bar	Spade Type connections	1/8"BSPT

# CLOGGING INDICATORS

## Differential Pressure Indicators - Selection Matrix

- Differential Pressure Indicators indicate when low, medium or high pressure filters are blocked, by providing a visual or electrical signal to the operator or electrical control when the differential pressure reading across the filter media reaches a preset level.
- Simply select the features and settings required for your application in the selection matrix below, and then find the appropriate indicator part number from the list of indicators that are assigned your selected filter series.

## GQPF-S/D Series - PortaFilta

Description	
The GQPF series PortaFilta is a compact filtration system designed to be fully portable in just about any environment. The PortaFilta is equipped with either a single or dual high efficiency filtration assembly capable of removing particulate contamination, water, or both, quickly, effectively and economically from mineral and synthetic oils.	
Features	
<ul style="list-style-type: none"> <li>● Available in Single Head or Dual Head options</li> <li>● Accepts a wide variety of filter media's to suit fluid types and cleanliness requirements</li> <li>● Robust steel construction</li> <li>● Clogging indicator indicates when element needs to be changed</li> <li>● Drip pan</li> <li>● Integral relief valve prevents over-pressurization</li> <li>● Integral suction strainer protects pump</li> <li>● Stop/Start Switch</li> <li>● Legendary BMG reliability</li> </ul>	

Specifications	
Pump Displacement:	30 lpm
Relief Setting:	4.5 Bar
Max Viscosity:	250 cSt
Electric Motor:	220 VAC, 380 VAC, 525 VAC, 12 VDC, 24 VDC
Clogging Indicator Type:	Visual (Colour Coded Gauge)
Hoses:	¾" X 3 Meters (X2)
Fluid Compatibility	Contact Call Centre

## GQMF-S/D/V Series - Mobile Filtration Unit

Description
The GQMF Series Mobile Filtration System is a compact, self-contained filtration system equipped with high efficiency, high capacity elements capable of removing particulate contamination, water or both conveniently and economically. It is perfect for cleaning up existing systems as well as for pre-filtering new fluids, since new fluids often have contamination levels significantly higher than that recommended for most hydraulic systems. The GQMF-S single filtration unit can remove either water or particulate contamination. The GQMF-D dual filtration unit can be used to remove both water and particulate contamination, or for staged particulate contaminant removal.
Features
• Base ported filter provides easy element change-out from the top without oil spills
• Clogging indicator indicated when element needs to be changed
• Cleans oil faster than other units due to higher displacement and higher efficiency for the Z Media option
• Superior dirt holding capacity
• Drip pan
• Integral relief valve prevents over-pressurization
• Integral suction strainer protects pump

Specifications	
Pump Displacement:	50 lpm (10 lpm for high viscosity version)
Relief Setting:	4.5 Bar
Max Viscosity:	250 cSt (2000 cSt for high viscosity version)
Electric Motor:	220 VAC, 380 VAC, 525 VAC
Clogging Indicator Type:	Visual Differential Pressure (Pop-up with manual reset)
Hoses:	1" X 3 Meters (X2)
Fluid Compatibility:	Contact Call Centre

# PORTABLE FILTRATION SYSTEM

## 10MFP SERIES

with Moduflow plus Portable Filtration Trolley

## SENTINEL™

Portable purification system

### Product Features

- 10 MFP hydraulic trolley is the ideal way to pre-filter and transfer fluids into reservoirs or to clean up a system.
- Maximum flow 38 l/min.
- Par-Gel water removal elements available.
- icountPD particle detector option available.
- Ms Moisture Sensor option (IPD integrated).

### Product Features

- Proven vacuum dehydration technology, ensuring only clean, dry oil re-enters the reservoir.
- On board data display and storage via IQAN MD3 display screen.
- Rapid detection and removal - embedded % RH moisture, and optional solid particle contamination detector.
- Sentinel mode - long life automatic switch on, measurement, operation and shut-off.

### Technical Specification

**Product description:**  
Transfers fluid from drums or storage tanks

**Maximum Recommended Fluid Viscosity:**  
10MFP (108 cSt)  
0.85 specific gravity

**Visual Indicator (outlet filter):**  
Visual differential type 3-band (clean, change, bypass)

**Filter Bypass Valve Settings (Integral to Element):**  
Inlet 0.2 bar  
Outlet 2.4 bar

**Flow Rate:**  
38 L/min

**Operating Temperature:**  
-40°C to +66°C

**Electrical Service Required:**  
10MFP 110/220 volts, 60/50 Hz, single phase, 10/5 amps

**Electrical Motor:**  
10MFP ¾ hp @ 3450 rpm, O.D.P.  
Thermal overload protection

**Construction:**  
Cart frame Steel  
Filter head Aluminum  
Filter bowl Steel  
Hoses PVC (Std.)  
EPDM (high temp option)  
Wands PVC (Std.)  
Steel tube (high temp option)

**Weight:**  
45.4kg

### Technical Specification

**Principle of operation**  
Vacuum dehydrator. 24 inHg

**Working pressure**  
0–4 bar (0 -60 psi)

**Working viscosity**  
1–460 cSt Packed Tower

**Flow range**  
12 l/min 5GPM

**Fluid connection inlet & outlet:**  
22L metric

**Fluid working condition**  
+ 70C at – 0.8bar

**Ambient storage temp. unit**  
-40°C to +80°C; -40°F to +176°F

**Operating temperature for unit**  
-30°C to +80°C; -22°F to +176°F

**Operating humidity range**  
5%RH to 100%RH

**Fluid operating temperature**  
+5°C to +80°C; +41°F to +176°F

**Moisture sensor linear scale within the range**  
5%RH to 100%RH

### Computer compatibility connection

Unit to be connected to a laptop computer via USB port

### Seals

Fluorocarbon

### Vacuum pump type

Dry sealed vacuum pump

### Particle filter type

5 micron 'iprotect' element

### Heater type

6KW low - density heater

### Power requirement

380-420VAC,3P,50Hz

### Noise level at standard operation

75 dBA

### Certification

IP54 rating (unit open)

CE marked

EC Declaration of Conformity

Machinery Directive

### Weight

190 kg

### icount Fluid Property Sensor (FPS) Contact Parker

### IQAN MD3 Display Memory size

Optional accessories	943237 – Service Kit (Triceptor element, Coalescer element, Filter element, Vacuum Pump Oil) ACC6JH003 – Vacuum Pump Oil (1 LITRE) MS1504 – Moisture Sensor

# PARTICLE COUNTERS

## FLUID PARTICLE DETECTORS

icount Oil sampler (IOS)

icountPD Online Particle Detector

Product Features
• Portable monitoring tool providing fluid qualification to ISO 4406: 1999 standards.
• Quick, simple to use monitoring tool for sampling fluids from containers, fuel bunkers and holding tanks.
• Field solution to laboratory methods for the detection of solid contamination and freewater inference
• On-board 250,000 test memory.
• MS moisture sensor standard.

Product Features
• Independent monitoring of system contamination trends.
• Warning LED or digital display indicators for Low, Medium and High contamination levels
• Visual indicators with power and alarm output warnings.
• Continuous performance for prolonged analysis.
• Moisture Sensor RH% integrated option
• Full PC/PLC integration technology.

## Technical Specification

The IOS quality condition monitor for hydraulic oils and hydrocarbon fuels uses advanced technology to produce extremely repeatable results.

At the heart of the system is a sophisticated laser detector, using a light obscuration flow cell, providing continuous measurement of fluid flow passing through a sample tube.

Measurements are taken every second as standard, although measurement intervals and test period can be defined by the user, with results being reported immediately and updated in real time.

Data is displayed on a built-in OLED digital display and can also be stored for subsequent upload via the embedded icounts web page interface connecting through a RJ45 cable

For pressure systems (more than 2.5 bar) a Pressure Reducing Valve (PRV) is included as standard

## Typical Applications

**Mobile Equipment**  
Earth Moving Machinery  
Harvesting  
Forestry  
Agriculture

**Industrial Equipment**  
Production Plants  
Fluid Transfers  
Pulp & Paper  
Refineries

**Power Generation**  
Wind Turbines  
Gearboxes  
Lubrication Systems

**Maintenance**  
Test Rigs  
Flushing Stands

**Fuel Contamination Detection**  
Fuel Storage Tanks  
Vehicle Fuel Tanks  
Uploading Fuel into an Aircraft

# INTERCHANGE TABLES

## PAR<sup>◊</sup>FIT™ SmaRT 1000

Pall SRT replacement filter element range

The Par Fit Smart1000 is a new range of replacement elements designed to be 100% interchangeable with the PALL UE219, UE319 and UE619 element series, but with greater affordability, advanced filter technology and availability 'on-demand'.

### Product Features

- Extraction handle - UE219 and UE319. Unique extraction handle, designed clean and simple removal of the element from the filter housing.
- Strengthened extraction ring - UE619. Increased material thickness around the extraction ring and support ribs prevents break-off during removal.
- Quantum fiber media - unique fibre composition that ensures maximum filter efficiency over an extended lifetime.
- Static Control filter media eliminates electro-static charging in hydraulic fluids, without compromising efficiency.

**PALL UE 219 & UE 319  
Replacement Elements**

Unique extraction handle – prevents direct contact with contaminated elements

**PALL UE 619  
Replacement Elements**

Extra thick extraction ring and support ribs – prevents break-off during replacement

# INTERCHANGE TABLES

## QUALITY INTERCHANGE ELEMENTS WITH A PROVEN RECORD

The Par Fit range offers end users, maintenance engineers and manufacturers a range of over 50,000 Parker Par Fit quality interchange elements using Microglass III and Ecoglass III media. Reduce stockholding, cut costs and ensure reliable and quality filter performance

Product Features		
• Par Fit elements are manufactured to the same exacting standards as Parker original elements using Microglass III and Ecoglass III media.		
• Quality backed by Parker's unrivalled technical resources.		
• Reduce stockholding and costs by sourcing all your replacement elements from Parker.		
• Interchange elements for Pall, Hydac, Mahle, Internormen, MP Filtri, Donaldson and over 300 more manufacturers.		
• Cross reference information available for over 50,000 part numbers.

# MAHLE PRODUCT TRAINING

## TYPE CODE FILTER HOUSING

Pi	2	0	05	-	058			
Purolator Industry 20 years ago	1 = suction	1 = duplex	value*10 = nominal size in l/min		Housing code			
	2 = low pressure							
	3 = medium pressure	7 = duplex						
	4 = high pressure	0 = single filter						
	5 = return line							

There are a few expectations:

Low pressure filters Pi 1941, Pi 1975, P i150

High pressure filters Pi 1123

Return-line filters Pi 1907

Duplex filters Pi 281

Please note: The suitable filter elements also have a 4-digit designation.

### Example:

Pi 2005-058 with filter element Pi 3105 ps 10

Housing Codes		Description
Code		
000		Flanged blind plug
001		Bypass-valve / flanged blind plug
002		Bypass-valve / visual indicator, flanged
003		Bypass-valve / electrical indicator, flanged
004		Visual indicator, flanged
005		Electrical indicator, flanged
006		
007		Special design (in connection with an explaining text)
008		
009		Bypass-valve 7 bar for high-pressure / 1.5 bar for return-line
010		Blind plug for indicator / without bypass-valve
011		Bypass valve 7 bar for high-pressure / 1.5 bar for return-line old (Pi 1844) blind plug for indicator
012		Bypass valve 7 bar for high-pressure / 1.5 bar for return-line visual indicator
013		Bypass valve 7 bar for high-pressure / 1.5 bar for return-line / electrical indicator
014		Visual indicator 5 bar
015		Electrical indicator 5 bar
016		Reverse-flow valve / blind plug for indicator
017		
018		
019		Bypass-valve / air breather element / magnet / electrical indicator
020		Bypass-valve / air breather element
021		Bypass-valve / air breather element / magnet
022		Bypass-valve / air breather element / magnet / filler / strainer
023		Bypass-valve / air breather element / filler / strainer
024		Bypass-valve / air breather element / strainer / visual indicator
025		Bypass-valve / air breather element / strainer / electrical indicator
026		Bypass-valve / air breather element / visual indicator
027		Bypass-valve / air breather element / electrical indicator
028		Bypass-valve / air breather element / blind plug for indicator
029		Bypass-valve / air breather element / magnet / filler strainer / electrical indicator
030		Bypass-valve / filler strainer

Pi	31				05 PS 10
Purolator industry	Filter material and retention rate				Nominal size
	01 = Sm-N2	71 = Drg vst 10 V2A	81 = Drg 10	91 = Drg vst 10	05 = NG 50
	10 = Mic 25	72 = Drg vst 25 V2A	82 = Drg 25	92 = Drg vst 25	08 = NG 80
	21 = PS 3	73 = Drg vst 40 V2A	83 = Drg 40	93 = Drg vst 40	11 = NG 110
	22 = PS vst 3	74 = Drg vst 60 V2A	84 = Drg 60	94 = Drg vst 60	15 = NG 150
	31 = PS 10	75 = Drg vst 100 V2A	85 = Drg 100	95 = Drg vst 100	30 = NG 300
	32 = PS vst 10	76 = Drg vst 200 V2A	86 = Drg 200	96 = Drg vst 200	45 = NG 450
	41 = PS 25	77 = Drg vst 300 V2A	87 = Drg 300	97 = Drg vst 300	60 = NG 600
	42 = PS vst 25	78 = Drg vst 500 V2A	88 = Drg 500 &	98 = Drg vst 500	
	51 = PS 6		cylindrical	99 = Drg vst	
	52 = PS vst 6		89 = Drg 250/400/500	cylindrical	

Please note: Filter elements are without sealing. The sealing is integrated in the filter head, not in the filter element. The suitable filter housings have a 4-digit designation. The nominal size of the filter element has to correspond to the filter housing.

### Example:

Pi 2005-058 with filter element Pi 3105 PS 10
